

What can you expect if you participate in this study?

Your participation would involve:

- 14-16 weeks of participation
- 5 visits to your study doctor
- a 1 in 2 chance of taking insulin injections
- daily blood sugar tests
- completing questionnaires
- giving a medical and family history
- a short physical exam by a study clinician
- blood tests
- receiving diet and exercise advice
- if you are willing, you may also receive ultrasound tests of the arteries in the neck.

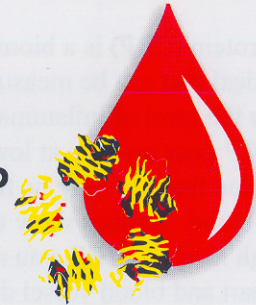

Subjects will be compensated for their time and effort.
